

SSgA S&P Mid Cap Index Fund - Class A

SSgA S&P Mid Cap Index Fund Class A represents units of ownership in the SSgA S&P Mid Cap Index Non-Lending Series Fund.

The Fund seeks to offer broad, low cost exposure to the stocks of medium sized U.S. companies.

Investment Objective

The SSgA S&P Mid Cap Index Fund (the "Fund") seeks an investment return that approximates as closely as practicable, before expenses, the performance of the S&P MidCap 400 IndexTM (the "Index") over the long term.

Investment Strategy

The Fund is managed using a "passive" or "indexing" investment approach, by which SSgA attempts to match, before expenses, the performance of the Index. SSgA will typically attempt to invest in the securities comprising the Index in the same proportions as they are represented in the Index. In some cases, it may not be possible or practicable to purchase all of the securities comprising the Index, or to hold them in the same weightings as they represent in the Index. In those circumstances, SSgA may employ a sampling or optimization technique to construct the portfolio in question. The Fund's returns may vary from the returns of the Index.

From time to time SSgA may purchase securities that are not yet represented in the Index or sell securities that have not yet been removed from the Index.

Fee Disclosure

The SSgA S&P Mid Cap Index Fund (the "Fund") seeks to achieve its investment objective by making direct investments in securities or by making investments in other investment funds, including those managed by SSgA and its affiliates ("SSgA Funds"). The Fund indirectly bears a proportional share of the fees and expenses of the SSgA Funds in which the Fund invests ("Indirect Expenses") which may include, among others, investment management, audit, custody, administration, and legal fees. Additionally, the Fund incurs direct fees and expenses ("Direct Expenses") which may include, among others, custody, audit, administration, and legal fees. The investment management fee for Class A units of the Fund is assessed outside the Fund and not included as part of the Direct Expenses, a portion (which may vary) may be paid to third-parties or intermediaries for recordkeeping, asset servicing, sub-accounting and communication services to plans invested in the Fund. The Indirect Expenses combined with the Direct Expenses of the Fund (the "Total Annual Operating Expense Ratio") are not expected to exceed .02% annually. You should contact your Plan Administrator for a complete description of the fees and expenses applicable to Class A units of the Fund, including the investment management fee.

The Total Annual Operating Expense Ratio of .02% reflects all indirect and direct fees and expenses associated with the Fund. Transaction costs (including, for example, brokerage costs, temporary investments in SSgA exchange traded funds, and taxes, if any) are not reflected in the Total Annual Operating Expense Ratio but are reflected in the net performance returns of the Fund. The investment manager does not assess or charge any fee in connection with the purchase or redemption of units of the Fund.

The following example is intended to help illustrate the impact of fees and expenses associated with an investment in the Class A units of the Fund (based upon the Total Annual Operating Expense Ratio). It is intended to illustrate the hypothetical expense that you would incur over various time periods if you were to invest \$10,000 in the Class A units of the Fund. This example assumes that the Fund provides a return of 5% a year and that operating expenses of the Fund remain the same. The results apply whether or not you redeem your investment at the end of the given time period.

Example Fees: 1 year - \$2.05; 3 years - \$6.46; 5 years - \$11.32; 10 years - \$25.76

The example outlined above was for illustrative purposes only and does not represent the actual expenses or the past or future performance of the Fund or the investment management fee or any portion of that fee that might be paid to a third party record keeper or intermediary. Actual future expense may be higher or lower than those shown.

Fees and expenses are only one of several factors that participants and beneficiaries should consider when making investment decisions.
