INVESTMENT OPTIONS OFFERED BY "HOUSING AGENCY RETIREMENT TRUST" (HART)

- 1. Stable Value/Fixed Income Fund** - The Fund is managed by Invesco, a leading manager of discretionary stable value portfolios. The Fund is exposed to market value risk in the event the financial institutions providing investment contracts to the Fund do not make good on their contractual obligations. Effective January 1, 2020, the investment charge is 0 basis points (0/100th of 1%). There is no sales charge.

Investment Objective & Strategy - The Fund's assets are invested in high quality fixed investments through either the direct ownership of securities or through the ownership of units within commingled funds investing in such securities. These investments are then wrapped by third party financial institutions such as banks and insurance companies to provide book value liquidity. In addition, the Fund may invest in investment contracts from banks and insurance companies that provide a stated rate of return. The Stable Value Fund seeks to provide current income with little or no fluctuation in underlying principal. For participant directed transactions, the Fund is maintained on a book value basis meaning that participant account balances are equal to the value of participant contributions plus accumulated interest less any participant directed withdrawals.

- 2. Vanguard Total Bond Market Index Fund Institutional Class Fund** - Managed by Vanguard. Assets are held in the Total Bond Market Index Fund. The investment charge is 4 basis points (4/100ths of 1%). There is no sales charge. This is an actively managed fund. Fund Ticker Symbol - VBTIX.

Investment Objective & Strategy - Vanguard Total Bond Market Index Fund seeks to track the performance of a broad, market-weighted bond index. The fund employs an indexing investment approach designed to track the performance of the Bloomberg Barclays U.S. Aggregate Float Adjusted Bond Index. This index measures a wide spectrum of public, investment-grade, taxable, fixed income securities in the United States-including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities, all with maturities of more than 1 year. The fund invests by sampling the index, meaning that it holds a range of securities that, in the aggregate, approximate the full index in terms of key risk factors and other characteristics. All of the fund's investments will be selected through the sampling process, and at least 80% of the fund's assets will be invested in bonds held in the index. The fund maintains a dollar-weighted average maturity consistent with that of the index, which currently ranges between 5 and 10 years.

- 3. Dodge & Cox Income Fund** - Managed by Dodge & Cox, San Francisco, the Fixed Fund Investment Policy Committee. Assets are held in the Income Fund. The investment charge is 42 basis points (42/100ths of 1%). There is no sales charge. This is an actively managed fund. Fund Ticker Symbol - DODIX

Investment Objective & Strategy - The Fund seeks a high and stable rate of current income, consistent with long-term preservation of capital. A secondary objective is to take advantage of opportunities to realize capital appreciation. The Fund invests in a diversified portfolio consisting primarily of investment-grade debt securities, including government and government-related obligations, mortgage- and asset-backed securities, corporate and municipal bonds, and other debt securities. To a lesser extent, the Fund may also invest in below investment grade debt securities. The proportions held in various debt securities will be revised in light of Dodge & Cox's appraisal of the economy, the relative yields of securities in the various market sectors, the investment prospects for issuers, and other factors. In selecting securities, Dodge & Cox considers many factors, including yield, credit rating, liquidity, call risk, duration, structure, and capital appreciation potential.

- 4. U.S. Inflation Protected Bond Index Non-Lending Series Fund - Class C** - Managed by State Street Global Advisors; assets are invested in the State Street Flagship Mutual Fund which parallels the U.S. Inflation Protected Bond Index Non-Lending Series Fund-Class C. The Fund seeks to offer broad, low cost exposure to U.S. Treasury bonds which automatically adjust to protect from increases in inflation. The investment charge is 6 basis points (6/100ths of 1%). There is no sales charge. This is a passively managed fund. Since this fund is not open to the general public, there is no Fund Ticker Symbol.

Investment Objective and Strategy - The Fund seeks an investment return that approximates as closely as practicable, before expenses, the performance of the Bloomberg Barclays U.S. Treasury Inflation Protected Securities (TIPS) Index (the "Index") over the long term. The Fund is managed using an "indexing" investment approach, by which SSGA attempts to approximate, before expenses, the performance of the Index over the long term. The Fund will not necessarily own all of the securities included in the Index.

17. PIMCO All Asset Fund Institutional Class - Managed by PIMCO owned by Allianz S.E., a leading global diversified financial services provider. Assets are held in the Real Estate Fund Institutional Class. The investment charge is 92 basis points (92/100ths of 1%). There is no sales charge. This is an actively managed fund. Fund Ticker Symbol PAAIX.

Investment Objective & Strategy – PIMCO All Asset Fund is a global tactical asset allocation strategy that seeks to provide investors with attractive long-term, real-return potential, while also diversifying traditional stock and bond allocations, reducing portfolio volatility and adding an explicit inflation buffer. The fund traditionally emphasizes “third pillar” assets (e.g., emerging market bonds and stocks, credit, commodities REITs, TIPS and other alternative strategies), which provide diversifying sources of return and, unlike core stocks and bonds, tend to have a reflationary bias (i.e., outperform the market when inflation is rising). The fund also benefits from two levels of expert management. Asset allocation decisions are managed by the fund’s subadvisor, Research Affiliates, LLC, a leading tactical asset allocation firm and underlying funds are managed by PIMCO, benefiting from our extensive global resources and time-tested investment process. The fund follows a value-oriented, contrarian approach - allocating to higher-yielding, lower-priced markets and shifting away from popular asset classes when they are overvalued.

18. JP Morgan U.S. Research Enhanced Equity Fund - Class R6 – The Fund seeks to provide a consistently high total return from a broadly diversified portfolio of equity securities with risk characteristics similar to the Standard and Poor’s Composite Stock Price Index (S&P 500 Index). The investment charge is 25 basis points (25/100ths of 1%). There is no sales charge. This is an actively managed fund. Fund Ticker Symbol - JDEUX

Investment Objective & Strategy – The investment seeks to provide a consistently high total return from a broadly diversified portfolio of equity securities with risk characteristics similar to the Standard and Poor’s 500 Composite Stock Price Index (S&P 500 Index). The fund invests at least 80% of its net assets plus the amount of borrowings for investment purposes in equity securities of U.S. companies. It primarily invests in the common stocks of U.S. companies in the S&P 500 Index (which includes both large cap and mid cap companies). The fund may also invest in securities not included within the S&P 500 Index.

19. SSgA S&P 500 Index Non-Lending Series Fund Class C - The Fund is managed by State Street Global Advisors (SSgA), the investment management division of State Street Bank and Trust Company, and a global leader in providing investment management solutions to clients worldwide. The investment charge is 5 basis points (5/100ths of 1%). There is no sales charge. This is a passively managed fund. Since this fund is not open to the general public, there is no Fund Ticker Symbol.

Investment Objective & Strategy – The Fund seeks an investment return that approximates as closely as practicable, before expenses, the performance of the S&P 500® Index (the "Index") over the long term. The Fund is managed using an "indexing" investment approach, by which SSGA attempts to approximate, before expenses, the performance of the Index over the long term. SSGA will typically attempt to invest in the equity securities comprising the Index, in approximately the same proportions as they are represented in the Index. Equity securities may include common stocks, preferred stocks, depository receipts, or other securities convertible into common stock. The Fund may purchase securities in their initial public offerings ("IPOs"). In some cases, it may not be possible or practicable to purchase all of the securities comprising the Index, or to hold them in the same weightings as they represent in the Index. In those circumstances, SSGA may employ a sampling or optimization technique to construct the portfolio in question. From time to time securities are added to or removed from the Index. SSGA may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, prior to or after their removal or addition to the Index. The Fund may at times purchase or sell index futures contracts, or options on those futures, or engage in other transactions involving the use of derivatives, in lieu of investment directly in the securities making up the Index or to enhance the Fund's replication of the Index return. The Fund's return may not match the return of the Index.

20. SSgA S&P Mid Cap Index Non-Lending Series Fund Class C - The Fund is managed by State Street Global Advisors (SSgA), the investment management division of State Street Bank and Trust Company, and a global leader in providing investment management solutions to clients worldwide. The investment charge is 5 basis points (5/100ths of 1%). There is no sales charge. This is a passively managed fund. Since this fund is not open to the general public, there is no Fund Ticker Symbol.

Investment Objective & Strategy - The State Street S&P Mid Cap® Index Fund (the "Fund") seeks an investment return that approximates as closely as practicable, before expenses, the performance of the S&P MidCap 400® Index (the "Index") over the long term. The Fund is managed using an "indexing" investment approach, by which SSGA attempts to approximate, before expenses, the performance of the Index over the long term. SSGA will typically attempt to invest in the equity securities comprising the Index, in approximately the same proportions as they are represented in the Index. Equity securities may include common stocks, preferred stocks, depository receipts, or other securities convertible into common stock. The Fund may purchase securities in their initial public offerings ("IPOs"). In some cases, it may not be possible or practicable to purchase all of the securities comprising the Index, or to hold them in the same weightings as they represent in the Index. In those circumstances, SSGA may employ a sampling or optimization technique to construct the portfolio in question. From time to time securities are added to or removed from the Index. SSGA may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, prior to or after their removal or addition to the Index. The Fund may at times purchase or sell index futures contracts, or options on those futures, or engage in other transactions involving the use of derivatives, in lieu of investment directly in the securities making up the Index or to enhance the Fund's replication of the Index return. The Fund's return may not match the return of the Index.
