

FUND INFORMATION

READ THIS IMPORTANT INFORMATION BEFORE YOU PROCEED

The rates of return reflect the performance in the funds for all investors. Actual investment performance for your own account may differ due to the timing of your transactions within the funds. Current performance may be lower or higher than the performance data shown.

The rates of return on the next page are reflective as of the month ending or quarter ending period depending on the view that you select. Rates of return shown may vary from other sources of published information and therefore may not be applicable for you to use in comparing a fund's return to a broad-based securities market index.

Performance data for all publicly traded mutual funds, excluding Money Market funds, is provided by Morningstar®. Performance information for Money Market funds and certain other types of funds is provided by the respective fund manager for the specific fund (or share class) available in your retirement plan.

The funds' investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. The return represents past performance. Past performance is no guarantee of future results.

The 7-day yield more closely reflects the current earnings of the money market fund than the total return quotation. Yields will vary.

An expense ratio is a fund's annual operating expenses expressed as a percentage of average net assets and includes management fees, administrative fees, and any marketing and distribution fees. Expense ratios directly reduce returns to investors. The expense ratio typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not affect the fund's brokerage costs or any investor sales charges. For publicly traded mutual funds, the net prospectus expense ratio is collected from the fund's most recent prospectus and provided by Morningstar. This is the percentage of fund assets paid for operating expenses and management fees. In contrast to the net expense ratio, the gross expense ratio does not reflect any fee waivers in effect during the time period. Morningstar pulls the prospectus gross expense ratio from the fund's most recent prospectus. Commingled Fund expense ratios are provided by the investment managers.

An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. Although the fund seeks to preserve the value of an investment at \$1.00 per share, it is possible to lose money by investing in the fund.

Performance returns assume funds were invested for the entire period. Actual returns on your account may differ because your investments are made over time through payroll deductions. Each of the funds involves special risks. Please refer to the fund's prospectus for a description of these risks. There may be other disclaimers related to the performance of specific funds under your plan. Please see your plan sponsor for additional information.

Investment options available through ADP Broker-Dealer, Inc. ADP Blvd., Roseland NJ 07068, a subsidiary of ADP, member FINRA (www.finra.org). For complete information about the funds, including the funds' investment policies, risk considerations, management, charges and expenses obtain a fund prospectus or fund fact sheet by clicking on individual fund names on the next page or from your company's plan administrator.

Under Section 408(b)(2) of the Employee Retirement Income Security Act of 1974, as amended, ADP is required to provide you with certain important information about your Plan's designated investments, as well as ADP's compensation for services to these investment funds.

Investment-related information. This includes:

- Any compensation that will be charged directly against the amount invested in an investment fund in connection with the acquisition, sale, transfer of, or withdrawal from an investment fund. Except for redemption fees, any such charges have been waived by the fund or do not apply. Certain mutual funds may charge a redemption fee which may apply when shares of the mutual fund are sold.
- The investment fund's total (i.e., "gross") annual operating expenses.
- Certain other information about the investment fund to the extent reasonably available to ADP. While this other information varies for certain types of investments, it generally includes information such as performance data, benchmarks, certain additional fee and expense information, and information about a fund's goals, strategies, risks and portfolio turnover rate.

Information about fund performance and total annual operating expenses for your Plan's designated funds, as well as available funds, is shown on the next page. ADP updates this information monthly. To calculate total annual operating expenses for a one-year period expressed as a dollar amount for a \$1,000 investment, multiply the gross expense ratio shown times \$1,000. (For example, a gross expense ratio of 0.75% X \$1,000 equals \$7.50 per \$1,000.00.) Additional investment-related information may be found in the disclosure and descriptive materials provided for each fund, which can be accessed by clicking on a fund's name on the next page. Any updates to these materials are posted at least quarterly (prospectuses monthly). Additional investment-related information for your Plan's designated funds may also be found in the Plan's Participant Fee Disclosure Statement (Select "Plan Information" from the "Resources" tab on the home page, click on "Fee Disclosure", then click on the "Participant Fee Disclosure" link). Any updates to this information, (including updates reflecting changes in your Plan's investment funds), are made monthly. Information about redemption fees and market timing restrictions in your Plan's designated investments may be found by selecting "Research Investment Funds" from the "Plan" tab on the home page, then clicking on the "Market Timing Restrictions" link. Redemption fee and market timing information for available funds not currently in your Plan may be found in a fund's disclosure materials, which may be accessed as explained above. Any updates to this information also are made monthly. ADP makes no representation as to the completeness or accuracy of disclosure materials provided by the issuer of an investment fund.

- **ADP Investment Compensation.** The next page also explains indirect compensation ADP expects to receive for services provided by ADP to the listed investment funds. This compensation generally is paid to ADP by the fund (or the fund's distributor, transfer agent, or another agent). In general, these amounts are paid to ADP Broker-Dealer, Inc., but in some cases, where permitted by law, may be paid to ADP, Inc. Percentages shown are based on the average daily balance of a plan's investment in the fund. Any updates to the investment compensation information shown will be made monthly. If ADP receives a service provider disclosure prepared by a provider of fiduciary services to a collective trust, ADP will post that disclosure with other fund disclosure materials; in some cases, this information may be included in other disclosure materials for a fund rather than in a separate document. ADP will post any updates to these disclosures on at least a monthly basis. Access fund disclosure materials as explained above. The types of compensation shown in each column and the services ADP provides include:
 - **The "12b-1 Fees" column:** This column shows 12b-1 fees ADP receives. 12b-1 fees generally are received for providing one or more of the following to or on behalf of investment funds or their affiliates: distribution services (including marketing), communication services, and shareholder servicing (includes: furnishing personal and other services and assistance, answering routine inquiries regarding a fund, assisting in changing dividend options, account designations and addresses, assistance with changing shareholder account designations and maintaining such recordkeeping accounts or such other services as the fund may require).
 - **The "Sub-TA Servicing Fees" column:** This column shows sub-transfer agent/shareholder servicing fees ADP receives. These fees generally are received for providing one or more of the following to or on behalf of investment funds or their affiliates: sub-accounting and administrative services (including, among others: order processing, recordkeeping, communications and shareholder/participant servicing).

The "Coll. Trust Service Payments" column: This column shows common collective trust service payments ADP receives. These payments generally are received for providing one or more of the following to or on behalf of common collective trust funds or their affiliates: sub-accounting and administrative services (including, among others: order processing, recordkeeping, communications and shareholder/participant servicing)

For a comprehensive description of the compensation ADP receives in connection with your Plan, please contact the ADP Retirement Services Client Services Department for a current copy of ADP's Compensation and Fee Disclosure Statement and Investment Fund Expense and Compensation Disclosure for your Plan.

457(b) DEFERRED COMPENSATION PLAN INVESTMENT OPTIONS OFFERED BY "HOUSING AGENCY RETIREMENT TRUST" (HART)

- 1. Vanguard Federal Money Market Fund Investor Class** - The fund will maintain a dollar-weighted average maturity of 60 days or less. The investment charge is 11 basis points (11/100ths of 1%). There is no sales charge. Fund Ticker Symbol VMFXX.

Investment Objective and Strategy - The fund invests primarily in high-quality, short-term money market instruments. At least 80% of the fund's assets are invested in securities issued by the U.S. government and its agencies and instrumentalities. Although these securities are high-quality, most of the securities held by the fund are neither guaranteed by the United States Treasury nor supported by the full faith and credit of the U.S. government. To be considered high-quality, a security generally must be rated in one of the two highest credit-quality categories for short-term securities by at least two nationally recognized rating services (or by one, if only one rating service has rated the security). The fund will maintain a dollar-weighted average maturity of 60 days or less.
