

## FUND INFORMATION

### READ THIS IMPORTANT INFORMATION BEFORE YOU PROCEED

The rates of return reflect the performance in the funds for all investors. Actual investment performance for your own account may differ due to the timing of your transactions within the funds. Current performance may be lower or higher than the performance data shown.

The rates of return on the next page are reflective as of the month ending or quarter ending period depending on the view that you select. Rates of return shown may vary from other sources of published information and therefore may not be applicable for you to use in comparing a fund's return to a broad-based securities market index.

Performance data for all publicly traded mutual funds, excluding Money Market funds, is provided by Morningstar®. Performance information for Money Market funds and certain other types of funds is provided by the respective fund manager for the specific fund (or share class) available in your retirement plan.

The funds' investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. The return represents past performance. Past performance is no guarantee of future results.

An expense ratio is a fund's annual operating expenses expressed as a percentage of average net assets and includes management fees, administrative fees, and any marketing and distribution fees. Expense ratios directly reduce returns to investors. The expense ratio typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not affect the fund's brokerage costs or any investor sales charges. For publicly traded mutual funds, the net prospectus expense ratio is collected from the fund's most recent prospectus and provided by Morningstar. This is the percentage of fund assets paid for operating expenses and management fees. In contrast to the net expense ratio, the gross expense ratio does not reflect any fee waivers in effect during the time period. Morningstar pulls the prospectus gross expense ratio from the fund's most recent prospectus. Commingled Fund expense ratios are provided by the investment managers.

An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. Although the fund seeks to preserve the value of an investment at \$1.00 per share, it is possible to lose money by investing in the fund.

Performance returns assume funds were invested for the entire period. Actual returns on your account may differ because your investments are made over time through payroll deductions. Each of the funds involves special risks. Please refer to the fund's prospectus for a description of these risks. There may be other disclaimers related to the performance of specific funds under your plan. Please see your plan sponsor for additional information.

Investment options available through ADP Broker-Dealer, Inc. ADP Blvd., Roseland NJ 07068, a subsidiary of ADP, member FINRA ([www.finra.org](http://www.finra.org)). For complete information about the funds, including the funds' investment policies, risk considerations, management, charges and expenses obtain a fund prospectus or fund fact sheet by accessing your personal account online at [www.hart-retire.com](http://www.hart-retire.com) "Employee Account Access" click on the menu item Investments, a drop down menu will appear, click on Investment Performance and Information.
